

# Masechtot Order Worksheet

Write the masechtot of a seder in order, from memory.

Two columns, 15 lines each — use one column for a whole seder, or fill in a different seder in each column.

| SEDER | סדר | SEDER | סדר |
|-------|-----|-------|-----|
|       |     |       |     |
|       |     |       |     |
|       |     |       |     |
|       |     |       |     |
|       |     |       |     |
|       |     |       |     |
|       |     |       |     |
|       |     |       |     |
|       |     |       |     |
|       |     |       |     |
|       |     |       |     |
|       |     |       |     |
|       |     |       |     |
|       |     |       |     |
|       |     |       |     |

Every seder has fewer than 15 masechtot — leave any extra lines in a column blank.
